## **Street Cleansing in the DDC Area**

Locations identified as Zone Z have a daily cleanse and continuous sweeper presence.

The cleansing methodology for Zones 2A, 2B, 3 & 4 is as described below:

Integrated Cleansing is delivered in accordance to a 3-2-1 approach to frequencies. That is, over the course of a Cleansing cycle, each locality receives one Primary Cleanse (1), and two Secondary Cleanses (2), making a total of three Cleanses (3). This approach is illustrated below;

The Integrated Cleansing frequency assigned by Veolia for each applicable Zone is detailed in the table below;

Zone	Cleansing Frequency	Integrated Cleansing Cycle	Primary Cleanse Frequency	Secondary Cleanse Frequency
2a	Weekly	3 Weeks	1 in 3 Weeks	2 in 3 Weeks
2b	Fortnightly	6 Weeks	1 in 6 Weeks	2 in 6 Weeks
3	Four Weekly	12 Weeks	1 in 12 Weeks	2 in 12 Weeks
4	Four Weekly	12 Weeks	TIII 12 Weeks	Z III 12 Weeks

Roads with a speed limit over 40mph are cleansed 1 - 2 times per year, and access is subject to the approval of the relevant highway authority.

Locations not listed below are not included in the contracted cleansing activity.

The Code of Practice on Litter and Refuse (2006) can be found on:
